

The E₂CØ Program Commercial/Industrial Buildings

eQuickCheck5

Collect utilization data, calculate EUI, determine client feasibility.

eQuickCheck Standard

Up to 3 years of energy data, local weather impacts, calculate EUI, determine client feasibility.

eQuickCheck PRO

Up to 3 years of energy data, local weather impacts, calculate EUI, benchmark data via Portfolio Manager. Report to local government.

eXpressAudit360

Walkthrough survey to identify systems in need of additional analysis

eBalanceZero

Create an energy and water balance, verify utility bills for accuracy.

eLuminate

Survey lighting, appliances and all energy consuming appliances throughout the facility.

HVAC Engineering

Detailed analysis of the building's heating, ventilation and air conditioning mechanicals.

eNvelopeAudit

Evaluation of the building's roof, walls, windows, doors and insulation.

eEnergyRenew

Evaluate the feasibility of various renewable energy technologies for the facility.

Water Consumption

Analyze water consumption across the facility and calculate benchmarks.

Zero Waste

Survey various waste sources and recycling programs and target reductions.
