

# eQuickCheck

## eQuickCheck

Identify potential clients by collecting simple energy utilization and water consumption data and calculating a Building EUI and Percentile Ranking

## eXpressAudit360

Conduct a quick site survey to help identify building envelope and systems deficiencies and their impacts on energy utilization and water consumption.

## eWeatherize

Geared towards multi-family residences and private homes, this survey includes a wide range of energy efficiency measures that encompass the building envelope, its heating and cooling systems, and its electrical consuming appliances.

The eQuickCheck is the first survey in the E<sub>2</sub>C<sup>0</sup> Program, a full suite of efficiency software with nine independent, yet interconnected, modules. The eQuickCheck survey has been designed to be used as a tool by the auditor to quickly identify potential clients and eliminate those buildings that are not candidates for efficiency projects. The eQuickCheck comes in three versions:

1. **eQuickCheck5** is a free offering to our partners to be used as a quick evaluation tool. It requires only basic energy data, and produces a simple one-page report, allowing the auditor to get a basic picture of energy and water efficiency.
2. For clients with up to three years of energy use data available, **eQuickCheck Standard** will provide a more detailed analysis of

## Key Results & Analyses:

- ◆ Quickly eliminate buildings with low potential for savings
- ◆ Identify clients that can benefit the most from follow-up analyses
- ◆ Energy Utilization Index (EUI)
- ◆ Building percentile ranking
- ◆ Water consumption
- ◆ Carbon footprint
- ◆ EPA Portfolio Manager submission (PRO version only)

energy and water use trends and potential efficiency savings. By focusing on the types of energy used and local variables, a more nuanced appreciation of a building's efficiency coefficient can be achieved.

3. **eQuickCheck PRO** has been designed for your clients that must report energy usage to the local government through the EPA's Portfolio Manager. The program meets the needs of all reporting requirements of the 9 cities and 2 state governments that have mandated energy benchmarking. As additional laws are passed, **eQuickCheck PRO** will be updated to comply with these new legislations.

simplifying savings
