The E₂CØ Program comprises a full suite of efficiency software programs with nine independent, yet interconnected, modules. The **eWeatherize** survey is the third of these modules, focusing on uncovering retrofits that will result in significant energy savings.

The **eWeatherize** software program evaluates cost-effective energy efficiency measures for existing residential and multifamily housing. A wide range of energy efficiency measures that encompass the building envelope, its heating, cooling and electrical systems, and electricity consuming appliances are investigated. Another distinguishing feature of **eWeatherize** is the focus on building safety, as many buildings receiving attention are old and in need of repair.
