What **ECO Zero** Can Do for You

Energy Is a Controllable Cost

- Today, energy is more than expensive—it's a liability.

- The energy problem is not going away.

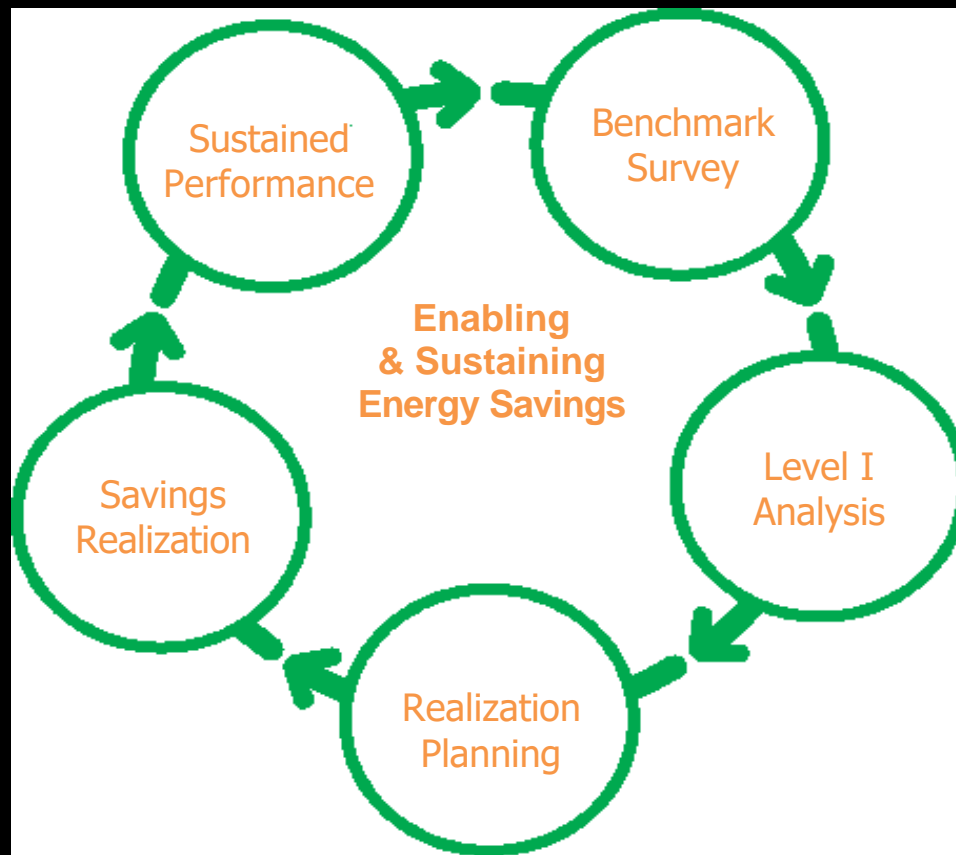

The Financial Benefits of Change

The point here is that energy is being wasted, and energy is money

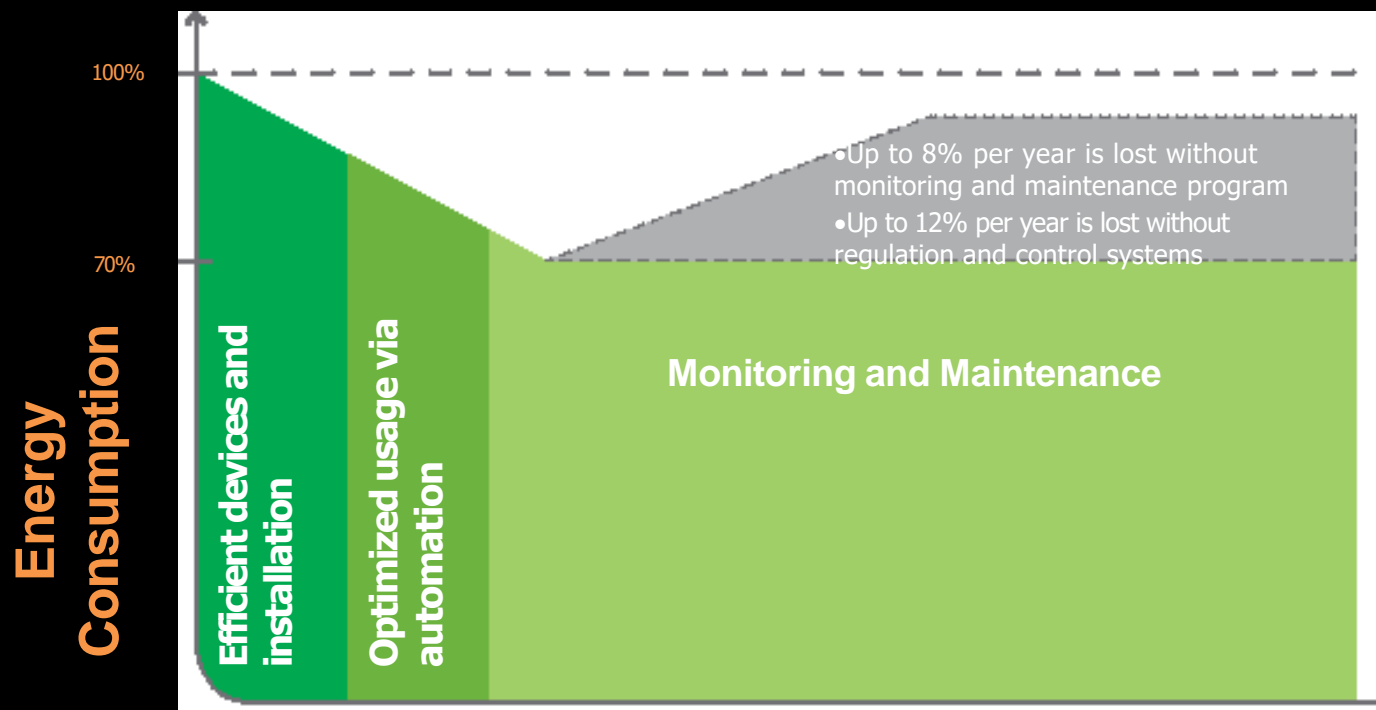

Of course, any kind of success starts with a commitment from executive management—your company’s “champion of energy efficiency.”

Energy savings in a building can reduce overall operating costs by 10%.

The Role of the Energy Champion

True Savings through E2C0

2 to 8% savings gained through monitoring

5 to 15% savings gained through optimized usage

10 to 15% savings gained through efficient devices

A Solution to Enable and Sustain Energy Efficiency

1.Measurement

2.Fixing the basics

Passive energy efficiency: one-third to one-half of potential savings

1.Automation

2.Monitor, maintain, and improve

Active energy efficiency: one-half to two-thirds of potential savings

What ECO *Zero* Can Do for You

E2CZero is the specialist in energy management—

- Safe,
- Reliable,
- Efficient,
- Productive,
- Green

Make the most of your energy.
